

Description

Pros don't just play games...Pros win games

Delivering 750W of maximum output and utilizing a four dedicated +12V rail, the Fatal1ty® Gaming Gear PSU allocates power where your system needs it most. This power supply can fuel the most demanding systems for PC enthusiasts, power users and gamers.

High-performance does not need to translate into over-the-top energy use! With an ultra-high 85% efficiency rating, the 80-Plus Bronze Certified Fatal1ty Gaming Gear PSU offers ultimate stability without driving up your energy costs.

Features low profile flat modular cables for even better airflow and a cleaner install. All cables are detachable, except the necessary mainboard connectors.

Backed by an industry-leading 5-year warranty, OCZ strives to continue offering the best product support in the industry.
